I received my Militec-1 shipment today, thank you for the quick service. I refuse to race my engines, transmissions and quick change rears without Militec-1. We race in the ASA AC Delco Series, 20 races a year on one half to one mile tracks with most races 300 – 400 laps. Engine and rear temperatures are 240° plus and after 40 races we are still running the same engines, transmissions, and rear ends with zero failures. Typically, most engines are run 5 to 6 races and at the outside never more than 10 races without overhaul. Our engines, which we intend to run a third season without overhaul, have excellent leak down (less than 8%) and perfect oil pressure. The chassis dyno also shows the same horsepower as when they were new.

Thank you again, Militec-1 is the best-kept secret in the racing industry.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Beattie". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
