Brad Ciordani, President
MILITEC
1901 North Moore St.
Suite 1204
Arlington, VA 22209

Dear Brad:

During the Spring of 1991 we were introduced to MILITEC-1 at the U.S. Secret Service Pistol Hatch in Beltsville, Maryland. The demonstration of its lubricating properties was enough to cause us to purchase some of your product.

We have been using a number of lubricants over the past years but none have had the impacting results as that of MILITEC-1. Our tests are not scientific in nature but our results speak for themselves. While using MILITEC-1 during a portion of the 1991 shooting season, our team won an impressive number of matches including the National Police Shooting Championship both team and individual honors, the World Revolver Championship Team Honors, and every gold medal in the World Police Games.

The Mississippi Highway Patrol team has many years of winning tradition at every level of competition. We hope, and work hard, to gain every advantage to improve our marksmanship skills and increase our proficiency. We feel that your product has enhanced our performance. MILITEC-1 can be added to a clean bore unlike many other lubricants on the market. We also apply MILITEC-1 to all bearing surfaces and exterior of our weapons. Its properties of molecular bonding have numerous advantages and we hope to continue using MILITEC-1 for many years to come.

Sincerely

A handwritten signature in dark ink that reads "Pat Cronin".
