

Cosworth Engineering, Inc. tested **MILITEC-1** on their G490 dynamometer using a Depac datalogger system. The test engine was a DFS 2.65 liter turbo-charged V-8, typical of engines that power Indy cars. **The results are shown above.**

Before **MILITEC-1** was added, peak HP was **709.9**.

After adding **MILITEC-1**, peak HP jumped to **717.6**.

This is a gain of nearly 8 horsepower.

No other changes or modifications were made to the engine! **All** the power gain was from **MILITEC-1**.
