Dear Peter,

Militec 1.

My name is Christopher Smith, I run a graphic design company and I am the author of the Smiffy series of children's books.

In the course of my business I travel 40,000 miles a year in a petrol engined BMW 535i and keep very careful mpg records. When you first told me about Militec-1 I admit I was a bit sceptical about the claims your company make for it. However, I added the correct amount to my engine oil and waited for the results. Initially there didn't seem to be much benefit, although I noticed that the engine ran more quietly and smoothly, there was less exhaust pollution and the general performance of my car improved.

My records are now starting to show that I buy less petrol, in other words I am also getting more mileage per gallon.

As far as I am concerned Militec-1 saves me money, it works!

Your Sincerely

Signature on File

Chris Smith
